Manifold Grace | Public Evidence Directory

Weekly | 2026-11-09 - 141 public dated log records

Generated UTC: 2026-11-13T16:34:31Z | Source: public productivity log | Original source articles are not reproduced.

Date integrity: the dates below are dates of the public log entries, not independently established original publication dates of linked external articles. An archive is not evidence that all historical publications have been captured.

Access: machine-readable JSON/CSV and a searchable HTML directory accompany these PDFs. PDF/UA conformance has NOT been independently established.

2026-11-13

Expanded tourism affordability inquiry: fiscal distribution, cultural access and AI representation
Original public log entry | Source evidence link

Recorded contextual questions on holiday affordability, recovery and cultural participation
Original public log entry | Source evidence link

Verified initial source-dated archive generation and corrected historical entry extraction
Original public log entry | Source evidence link

Built period-based downloadable public evidence archive and three linked working manuscripts
Original public log entry | Source evidence link

Added dated source and standards register to archive project and three working manuscripts
Original public log entry | Source evidence link

Published architecture, compliance, cybersecurity and research publication learning pathways
Original public log entry | Source evidence link

Unified navigation order, borderless menu styling and live news-image support
Original public log entry | Source evidence link

Added external collaborative multi-model reasoning as a separate AI safety experiment
Original public log entry | Source evidence link

Established a site-wide monochrome button and logo visual rule
Original public log entry | Source evidence link

Developed neutral educational framework for hypothetical AI partnership risks
Original public log entry | Source evidence link

Recorded eight research questions on publication histories, temporal evidence and long-term AI reliability
Original public log entry | Source evidence link

Created a privacy-preserving guided visitor pathway to existing research, funding and project resources
Original public log entry | Source evidence link

Published financing-agreement safeguards across funding, research and venture systems
Original public log entry | Source evidence link

Linked children's educational access and cultural participation to AI data and model evaluation
Original public log entry | Source evidence link

Extended collaborative AI safety research to distributed intelligence scaling
Original public log entry | Source evidence link

Extended project architecture and assurance research to creative arts, humanities and social responsibility
Original public log entry | Source evidence link

Published continuous code-to-outcome verification research and dated official releases
Original public log entry | Source evidence link

Extended AI safety filter research with context-augmented cross-analysis
Original public log entry | Source evidence link

Established conceptual collaborative AI research consortium initiative, project, paper and contextual research question
Original public log entry | Source evidence link

Added children's educational travel and lone-parent inclusion to tourism affordability research
Original public log entry | Source evidence link

Recorded newsletter unsubscribe accessibility and interface concern
Original public log entry | Source evidence link

Built a dated AI news research index with scheduled source-metadata collection
Original public log entry | Source evidence link

Improved archive download discoverability and clarified historical coverage
Original public log entry | Source evidence link

Established a self-calibrating AI safety filters research initiative and paper protocol
Original public log entry | Source evidence link

2026-11-12

Expanded government and public-systems exploratory research with contextual questions on legislative priorities and equality
Original public log entry | Source evidence link

Structured systemic-review framework into three tiers with sector overlays and evidence-based diagnostic rubric
Original public log entry | Source evidence link

Published Systemic Review and Rebuilding the System reference framework
Original public log entry | Source evidence link

Extended systemic review framework from 24 to 40 areas
Original public log entry | Source evidence link

Recorded synthetic-media, deceptive-advertising and public-trust research questions
Original public log entry | Source evidence link

Refined interior website typography and page styling across shared design system
Original public log entry | Source evidence link

Recorded exploratory procedural-integrity and preventive systems research direction
Original public log entry | Source evidence link

Added five systems-based research questions focused on preventing recurring institutional barriers
Original public log entry | Source evidence link

Reduced shared page-loading scene timings by half
Original public log entry | Source evidence link

Extended home and distributed networking topology reference
Original public log entry | Source evidence link

Published home connectivity, compute, cybersecurity and AI reference guide
Original public log entry | Source evidence link

Expanded virtual-first home systems reference with cloud environments and GPU options
Original public log entry | Source evidence link

Consolidated genealogical evidence, heritage-conservation and housing-policy research (12 November 2026)
Original public log entry | Source evidence link

Catalogued five exploratory research directions without launching papers
Original public log entry | Source evidence link

Audited free virtual infrastructure resources and published an expandable service directory
Original public log entry | Source evidence link

Expanded free software and virtual infrastructure options across eight additional technical areas
Original public log entry | Source evidence link

Recorded English identity and census-classification parliamentary development
Original public log entry | Source evidence link

Published diplomacy, peacebuilding and civilian resilience reference guide
Original public log entry | Source evidence link

Expanded anonymised future-research catalogue across workplace, benefits, credit, housing and public accountability systems
Original public log entry | Source evidence link

Added anonymised future research directions on psychological safety and institutional accessibility
Original public log entry | Source evidence link

Added exploratory research on AI, employment opportunity and economic distribution
Original public log entry | Source evidence link

Established a military-history exploratory branch identifying mechanisms of historical knowledge loss and methods to reduce preventable gaps in contemporary conflicts.
Original public log entry | Source evidence link

2026-11-11

Adjusted homepage Earth to remain zoomed out throughout automatic rotation
Original public log entry | Source evidence link

Published additive dissertation and viva preparation lab
Original public log entry | Source evidence link

Connected 28 venture candidates to multidisciplinary research and funder alignment
Original public log entry | Source evidence link

Catalogued specialist funding displacement
Original public log entry | Source evidence link

Added site-wide public-interest benefits
Original public log entry | Source evidence link

Expanded research-polishing atlas across dossiers, terminology and scientific methods
Original public log entry | Source evidence link

Clarified discipline-linked research publication status
Original public log entry | Source evidence link

Expanded and ranked 50 funding routes
Original public log entry | Source evidence link

Expanded the funding directory and improved mobile layout
Original public log entry | Source evidence link

Added a research funding directory
Original public log entry | Source evidence link

Updated public research-and-consultancy description and verified pre-incorporation funding approach
Original public log entry | Source evidence link

Refined publication wording for evidence and attribution
Original public log entry | Source evidence link

Refined publication wording with exact before-and-after version history
Original public log entry | Source evidence link

Published public-integrity implementation-gap research and AI reporting design
Original public log entry | Source evidence link

Added the Projects & Architecture register
Original public log entry | Source evidence link

Added the project academic crosswalk
Original public log entry | Source evidence link

Expanded MA dissertation and doctoral polishing evidence map
Original public log entry | Source evidence link

Added official model-performance history and caveats to AI intelligence testing guide
Original public log entry | Source evidence link

Published dissertation, viva and research-polishing preparation hub
Original public log entry | Source evidence link

Published compact scrolling interdisciplinary reels above existing Earth animation
Original public log entry | Source evidence link

Published Independent Research Questions Observatory
Original public log entry | Source evidence link

Moved international news previews onto the homepage and connected open-index retrieval
Original public log entry | Source evidence link

Refined approved homepage identity while retaining the original banner
Original public log entry | Source evidence link

Published university-to-work institutional bridges and contact directory
Original public log entry | Source evidence link

Refined international news into a compact mobile-first preview dashboard
Original public log entry | Source evidence link

Published funding, procurement and research partnerships gateway
Original public log entry | Source evidence link

Expanded funding and procurement application directory and outsourced-administration framework
Original public log entry | Source evidence link

Added the Foreseeable Harm Catalogue
Original public log entry | Source evidence link

Published a proposal on foreseeable harm and ministerial accountability
Original public log entry | Source evidence link

Published exploratory AI quality and governance comparison
Original public log entry | Source evidence link

Recorded conditional award and deferred-incorporation research approach
Original public log entry | Source evidence link

Published research red flag: certification, assessment validity and access bottlenecks
Original public log entry | Source evidence link

Expanded inclusive academic discipline reel with uninterrupted scrolling
Original public log entry | Source evidence link

Added anticipated challenges to About
Original public log entry | Source evidence link

Published separate annotated code and workflow explanation pages for seven continuing research and operations areas
Original public log entry | Source evidence link

Published beginner guide to evaluating AI response depth, breadth and contextual reliability
Original public log entry | Source evidence link

Added AI Futures 2026 and international news directory; consolidated research funding priorities
Original public log entry | Source evidence link

Documented research learning: authorship, intellectual property and fixed AI oversight controls
Original public log entry | Source evidence link

Published historical AI-auditing evidence review
Original public log entry | Source evidence link

Published the position on AI assistance and academic credit
Original public log entry | Source evidence link

Published original agent-assisted AI architecture assurance proposal
Original public log entry | Source evidence link

2026-11-10

Registered public-good discovery and source-aware visual research audit project and paper initiative
Original public log entry | Source evidence link

Added eight-venture opportunity scoring matrix and AI-stack advisory service blueprint
Original public log entry | Source evidence link

Published cross-industry comparative AI systems architecture atlas
Original public log entry | Source evidence link

Published Salesforce, Einstein Analytics and open-tool business accelerator
Original public log entry | Source evidence link

Recorded historical early-years robotics and programming work (2017)
Original public log entry | Source evidence link

Implemented controlled public research publication catalogue
Original public log entry | Source evidence link

Published source contracts, offline intake starter, reproducible templates, browser demonstrations and dated market snapshot
Original public log entry | Source evidence link

Established societal-resilience and AI public-adviser programme with a browser demonstration
Original public log entry | Source evidence link

Improved research papers and projects presentation standard
Original public log entry | Source evidence link

Created integrated 20-workstream programme, breadth-first AI taxonomy and working architecture comparison demonstration
Original public log entry | Source evidence link

Expanded public institutional contact directory with distinct notification and scrutiny tiers
Original public log entry | Source evidence link

Implemented and tested a read-only code knowledge-graph evaluation
Original public log entry | Source evidence link

Connected UK government research themes to Government Arms
Original public log entry | Source evidence link

Expanded governmental responsibility-to-scrutiny crosswalk
Original public log entry | Source evidence link

Added 20 evidence-qualified future venture opportunity ideas for 2027
Original public log entry | Source evidence link

Published a free and low-cost AI infrastructure and account-readiness register
Original public log entry | Source evidence link

Expanded free and low-cost AI infrastructure register from 27 to 63 options
Original public log entry | Source evidence link

Implemented reusable evidence-and-contradiction evaluation infrastructure
Original public log entry | Source evidence link

Published inclusive equitable-living and civil-rights initiatives directory
Original public log entry | Source evidence link

Expanded 2027 opportunity-window research from 20 to 28 venture candidates
Original public log entry | Source evidence link

Implemented shared breadth-first topic navigation and optional sideways browsing
Original public log entry | Source evidence link

Documented security and geopolitical supplier-risk considerations for 63 AI tools and 20 historical cases
Original public log entry | Source evidence link

Integrated the history of societal intelligence platforms with AI research history
Original public log entry | Source evidence link

2026-11-09

Verified and repaired 30-theme UK public-systems research directory
Original public log entry | Source evidence link

Established systems completeness, fairness and ecosystem stewardship research initiative
Original public log entry | Source evidence link

Created full-site printable review checklist
Original public log entry | Source evidence link

Implemented structural SEO guides and framework cross-links
Original public log entry | Source evidence link

Published search visibility and knowledge discovery improvements
Original public log entry | Source evidence link

Published six downloadable academic manuscript templates
Original public log entry | Source evidence link

Published illustrative pilot collaboration agreement template
Original public log entry | Source evidence link

Published national and global frameworks completeness atlas
Original public log entry | Source evidence link

Published music, events and strategic partnerships programme
Original public log entry | Source evidence link

Published comparative migration fairness research and paper initiative
Original public log entry | Source evidence link

Industry collaboration & product development page published
Original public log entry | Source evidence link

Established education and learning-development research initiative
Original public log entry | Source evidence link

Initiated evidence-calibrated social reasoning research and paper
Original public log entry | Source evidence link

Research outreach and genealogical evidence preparation
Original public log entry

Public-site privacy and reputational-risk review
Original public log entry | Source evidence link

Compared high-tier publishing layouts and extended doctoral paper standards
Original public log entry | Source evidence link

Published doctoral AI research scientist skills and paper standards
Original public log entry | Source evidence link

1. UK Government, Institutions & Public Systems research programme
Original public log entry | Source evidence link

Expanded collaboration pathways and organisational outcomes
Original public log entry | Source evidence link

Extended beauty, harmony and socially responsible AI research
Original public log entry | Source evidence link

Extended AI aesthetics research to social-responsibility training and governance
Original public log entry | Source evidence link

Built interactive AI systems research and demonstration programme
Original public log entry | Source evidence link

Created interdisciplinary AI perception and responsible decision-support research page
Original public log entry | Source evidence link

Research-contact privacy correction
Original public log entry

Research outreach — historical records
Original public log entry

Research-connections page removal
Original public log entry

Approved public privacy refinements
Original public log entry | Source evidence link

Research outreach — additional subject areas
Original public log entry

2. Research explorer expanded to include nested UK government themes
Original public log entry | Source evidence link

Historical and family research — terminology refinement
Original public log entry | Source evidence link

Privacy-first editorial revision with Git version control
Original public log entry | Source evidence link
